Hello, my name is Caity Hawksley. I'm ten years old. I think that putting people through this is wrong.

- 1... [If you bring the nuclear waste through on our railroads, anything can happen like a train crash, which would cause the barrels to break and the nuclear waste to go all over.

I myself live by railroad tracks and there are over 40 houses on my block, meaning there are a lot of people. I'm sure you would not want to be in charge of so many dead people.

One other reason is that if you bury it in the ground, if an earthquake would occur, then plants, and animals will also die.

- 2 I have a question: [Why did you even make it? I mean, if you made it, it's your responsibility. Haven't you ever heard of the saying, "If you make a mess, then you clean it up?"]

- 3 [You're cleaning up your mess the wrong way. You should build a concrete wall around the nuclear waste, not send it to Yucca Mountain.

- 1 cont. [So, please, Listen! Don't send the nuclear waste through!] I really don't want the population of our world to go down.

Thank you.
